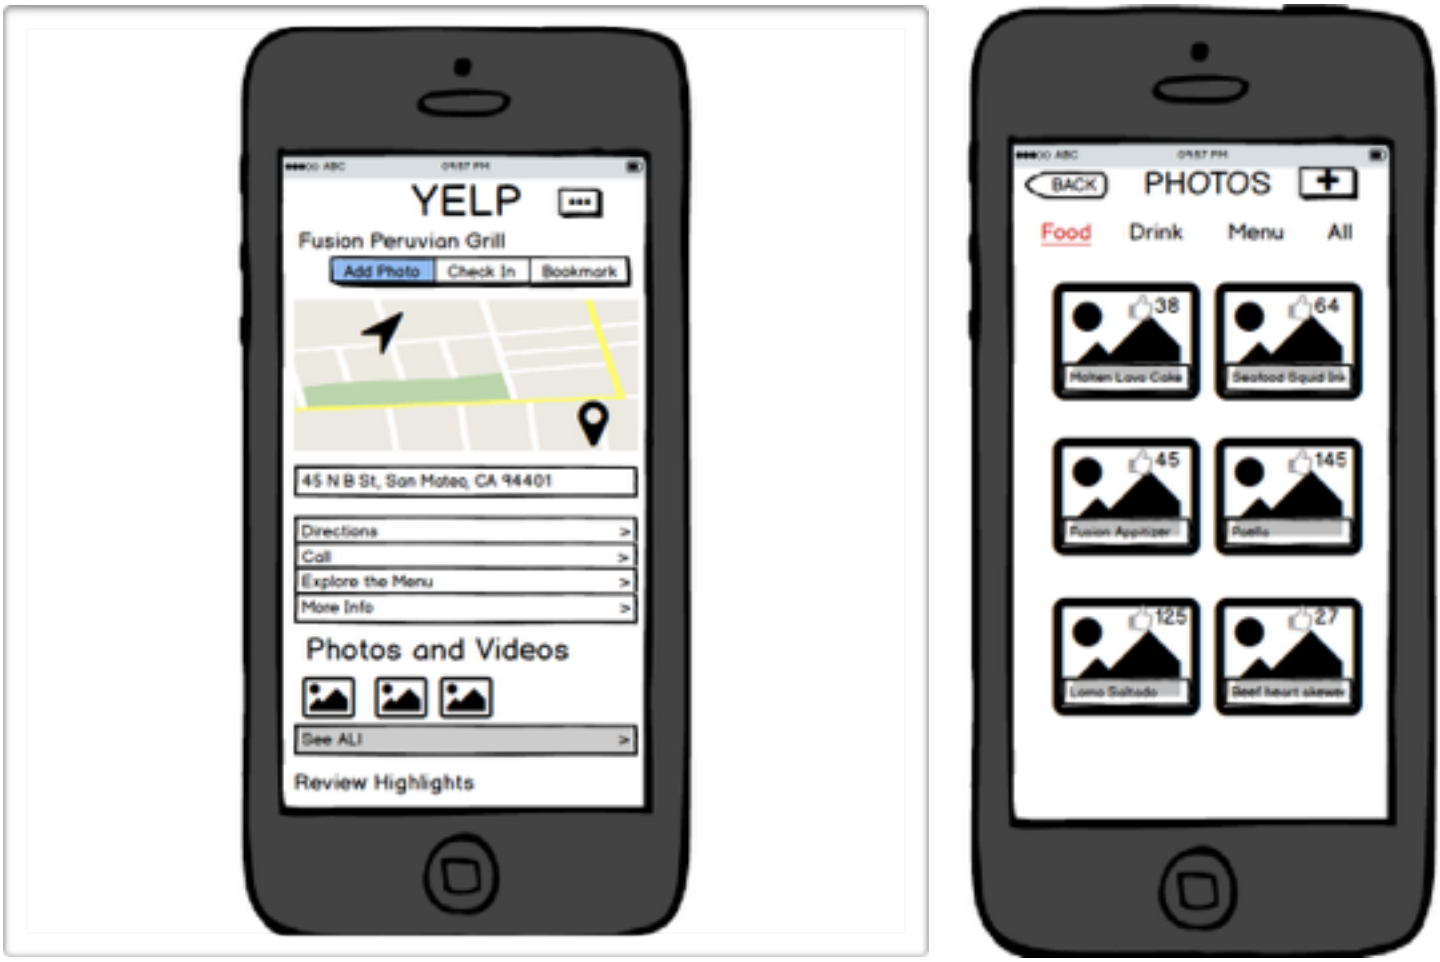
YELP

Improving Yelp Photos Feature

As a user, I want to order those delicious food posted on Yelp photos since it is my first dine here and hope I can look through photos by category.

FEATURE DESIGN - ADDING YELP MEAL CATEGORIES



Users always check yelp before they visit new restaurant. Any users can upload photos they taken with a caption. To help users to better find out what meals they want to order, photos for food can be classified by each meal with the caption uploaded by other users.
